Magic Calendar

An Advent Calendar celebrating festivals around the world

Magic Calendar is a simple front-end application that uses HTML, CSS, JavaScript and Bootstrap.

HTML - General site structure.

CSS - Site styling and appearance.

Bootstrap - Supplement CSS and JS to add styling templates and interactivity.

JavaScript - Site functionality and interactivity.

Color Scheme (subject to change)

#799351

Element Color - the 'Box' for each calendar item

#A1DD70

Hover Element Color

#F6EEC9

Website Background Color

#EE4E4E

Alternative Element Color

The colour palette was chosen based on a general theme of 'festivity'. These colours are reminiscent of the holiday season and contain elements of colour often seen used in art of Santa Claus and elves. While the calendar is designed to celebrate a variety of festivals and holidays, Given that Christmas is close, we feel these colours invoke the themes of the current holiday season.

Alternating between red and green 'boxes' on the advent calendar might lean into the festive theme well. Alternatively, we could use red and off-white accents to provide a 'candy cane' look.
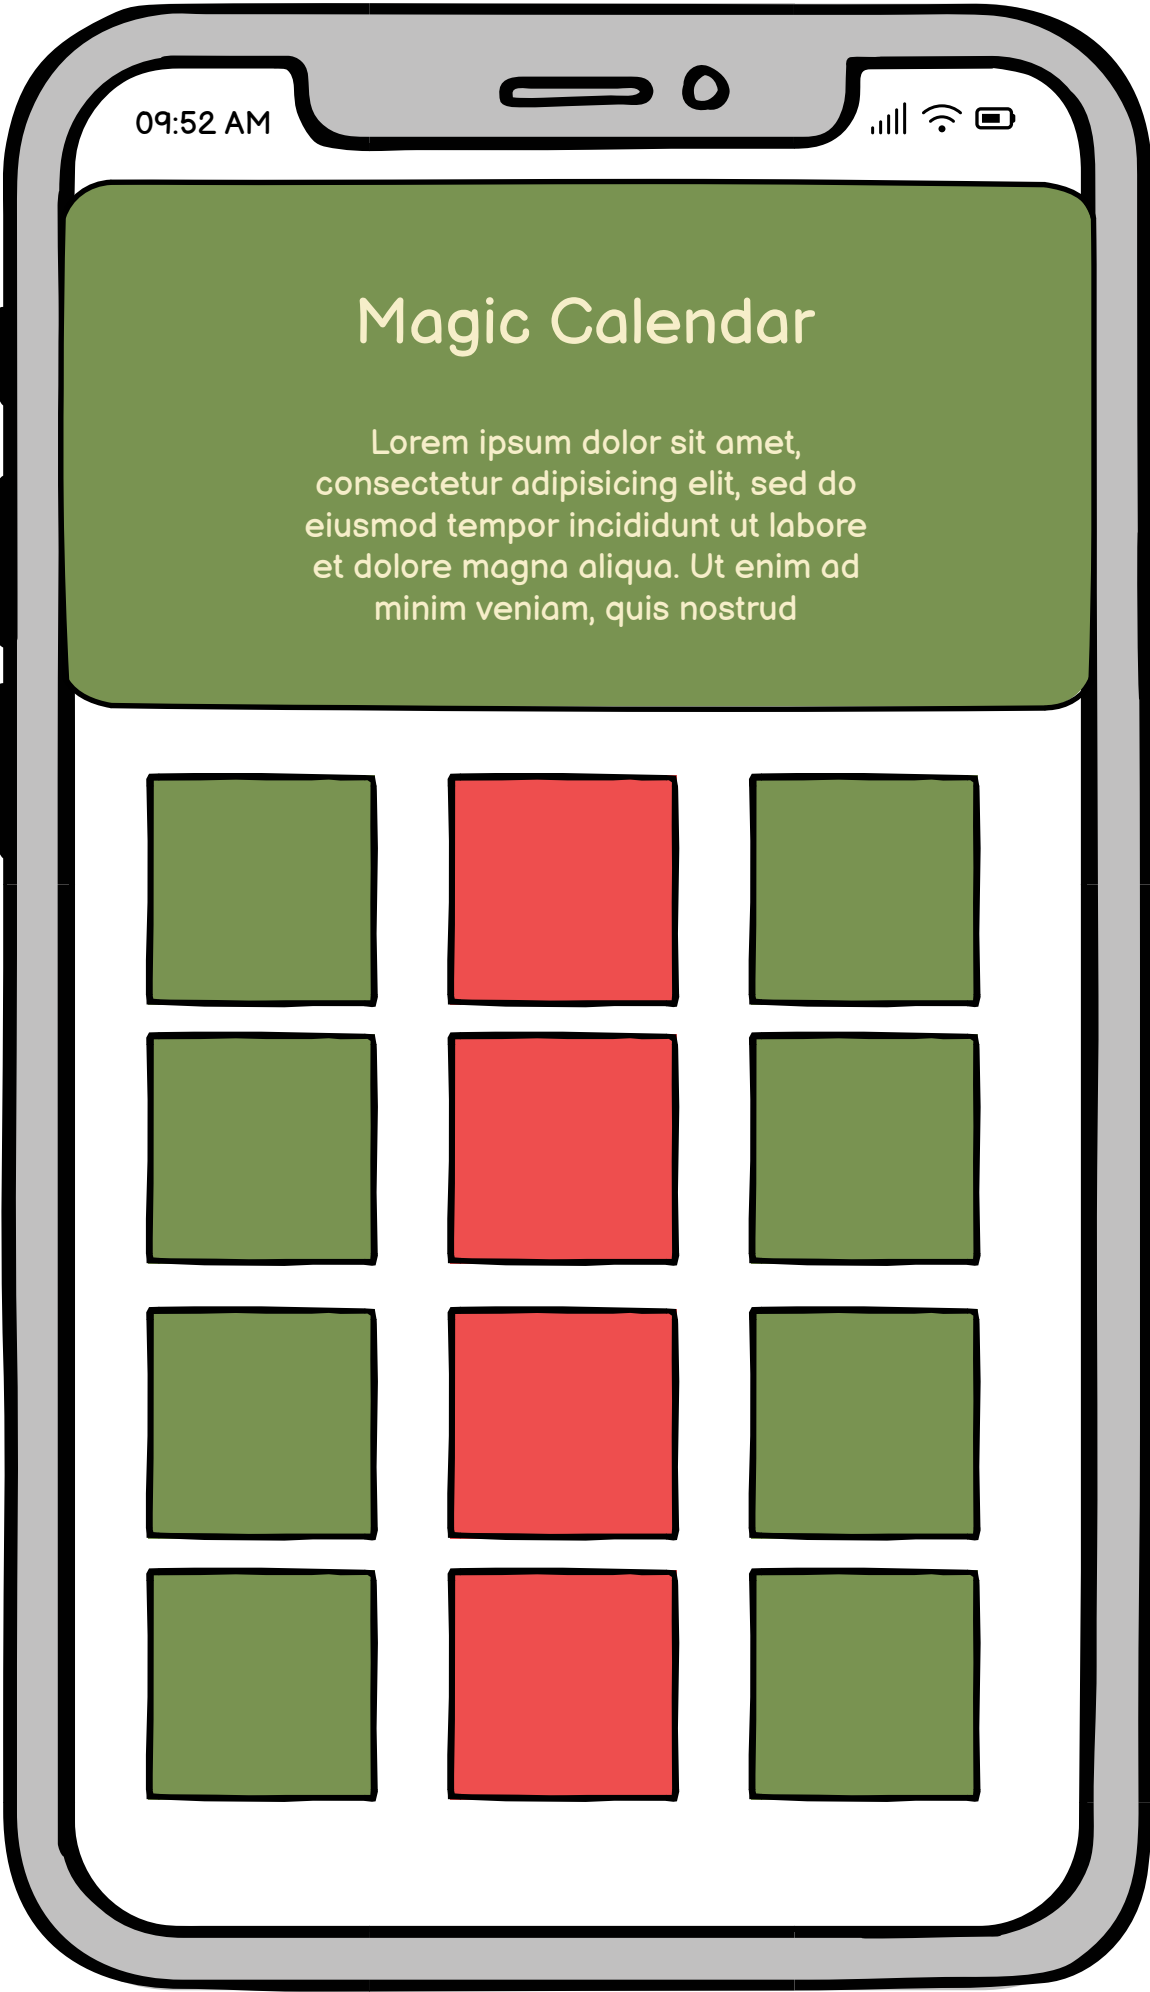

User Stories

First Time Visitors
- As a first time visitor, I want to be able to clearly understand the purpose of the site.

Frequent Visitors
- As a frequent visitor, I want the site to have new content available to me each day.
